Insights:

- There were 82,260 respondents, 40.3% of which were female participants, 59.5% male participants, and other gender descriptions of 0.2%.
- Parents have a significant influence on the career choices of respondents. World leaders, media influencers, close circle, and LinkedIn were next in order of significance.
- About 69% of respondents are interested in traveling abroad for studies.
- Over 50% of respondents prefer employers who reward job-related studies (learning).
- The GenZ spread of career choices suggest passion to embrace technology in diverse facets.

Recommendations:

- Create programs that engage with parents and guardians to align their influence with the organization's career development goals.
- Enhance policies that reward and recognize job-related learning and professional development.
- Invest in and promote technology-focused career opportunities and skills development.
